

## MAT STANDARDS POSTER

# MAT STANDARDS

## Medication Assisted Treatment

**01.**

You have the option to start MAT - a prescription, when clinically appropriate, or access to other support - from day one

**02.**

You will be supported to make a choice on what medication treatment is right for you

**03.**

Services will identify if you are at high risk of drug-related harm and continue to reach out and work with you

**04.**

You will be offered harm reduction services while in treatment - this will not affect your support or prescription

**05.**

You are given support to stay in treatment for as long as needed - there should be no unplanned discharges

**06.**

Services will support you to develop positive relationships and new ways of coping with difficult emotions and issues from the past

**07.**

You can choose to receive your medication and support through primary care providers - such as GPs and community pharmacies

**08.**

You have access to dedicated independent advocacy and support workers for housing, welfare and income needs

**09.**

You can ask for support with mental health difficulties while being supported as part of your treatment and care

**10.**

Services will offer a relationship that promotes healing and supports you to access, and remain in, services for as long as you need
